Software Development Engineer in Test with proven expertise in API testing automation, CI/CD optimization, and code quality improvement. Experienced in creating comprehensive test suites using the Karate framework, optimizing Jenkins pipelines, and implementing maintainable code practices.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python

Testing & CI/CD: Karate, Gherkin, Postman, Jenkins

Web Technologies: HTML, CSS, React, Node, Express, Apollo GraphQL, Spring Boot

Databases & Tools: MySQL, MongoDB, Grafana, Git, GitHub, Jira, Agile, Microsoft Office

PROJECTS

onTask | <https://ontask-cf7r.onrender.com/>

- **Summary:** A task manager to check and update project tasks, showcasing skills learned in the MERN stack
- **Role:** Sole author
- **Tools:** Mongoose, Express, React, Node

Fatacat Expense Tracker | https://github.com/codeygallup/fatcat_expense_tracker

- **Summary:** Designed a full-stack system to track user balances and bills, showcasing integration of Spring Boot and Next.js
- **Role:** Sole author
- **Tools:** Java, Spring Boot, Next.js, MySQL

EXPERIENCE

SDET
Clover

Sep 2024 - Present
Colorado Springs, CO

- **API Test Development:** Created comprehensive test suites for new endpoints using the Karate framework and Gherkin syntax, ensuring robust API validation and reliability
- **CI/CD Pipeline Optimization:** Fixed Jenkins configuration to prevent unnecessary daily rebuilds across all branches, stabilizing the regression environment and reducing database load
- **Code Optimization & Maintenance:** Removed thousands of lines of outdated and redundant code from test repositories, implementing DRY principles and best practices to improve maintainability
- **Team Onboarding & Training:** Developed comprehensive training documentation for new SDET team members, covering tech stack overview, installation procedures and style guides, team structure, Jira workflows, and internal Confluence resources

Field Technician
LiquiServe

June 2023 - Jan 2024
Colorado Springs, CO

- Installed customer setups and provided troubleshooting for technical issues.
